Congratulations to Greg Wang promoted to full professor

March 31, 2022

Congratulations to Biochemistry and Biophysics faculty Greg Wang promoted from associate professor to full professor retroactively effective January 01, 2022. Greg Wang is also a full member of Lineberger Comprehensive Cancer Center and a joint faculty of Pharmacology Department.

Greg Wang PhD

His research programs are broadly focused on mechanistic understandings of how chemical modifications of chromatin define distinctive patterns of mammalian genomes, control gene expression and regulate cell fates during development, and how their deregulations lead to human disease such as cancer, developmental disorder and aging.
